

Handdrilled Wells + Manual Rope Pumps

as help for helping oneself to get
drinking water in the D.R. Congo

- > bundance of plants, animals, mineral resources, and freshwater reserves
- > bloody conflicts, corruption, poverty, displacement, deseases

Both sides of a country, in which greed leads to exploitation. The profits flow to warlords, arms dealer, businessmen, politicians and big companies. The burden bears the local population

*" strengthen local autonomy to
reduce global dependancy "*

We volunteer to help suffering people to improve their situation on their own. Our Currency is water. Every Euro flows to the School for Well Drilling in Kikwit:

- 100 € funding course participants
- 3.800 € well
- 4.200 € Course for 20 well builders
- 5.000 € Mobile drinking water lab.
